

22. The sequence of eating and being eaten in an ecosystem is called
- Food chain
 - Carbon cycle
 - Hydrological cycle
 - Anthroposystem
23. Which of the following is a producers in an ecosystem
- Plants and some bacteria capable of producing their own food
 - Animals
 - Human beings
 - Fish
24. The driving force for the circulation of water in the hydrological cycle is provided by _____
- Ozone
 - Sun
 - Moon
 - Mercury
25. Which of the following statements is false?
- Inorganic nutrients are recycled in an ecosystem
 - Energy flows through the ecosystem in the form of carbon-carbon bonds
 - Energy is recycled in an ecosystem
 - Respiration process releases energy
26. The largest reservoir of nitrogen in our planet is
- Oceans
 - Atmosphere
 - Biosphere
 - Fossil fuels
27. In aquatic ecosystem phytoplankton can be considered as a
- Consumer
 - Producer
 - Saprotrophic organisms
 - Macroconsumer
28. The Greek word "Oikos" means -----
- surroundings
 - Habitation
 - Food chain
 - Food web
29. The basic requirements of human beings are provided by
- Industrialization
 - Agriculture
 - Nature
 - Urbanization
30. Environment is the life support system that includes
- Air
 - Water
 - Land
 - All of the above
31. Organisms which feed directly or indirectly on producers are called
- Prey
 - Consumers
 - Decomposers
 - Detritus
32. The primary producers in a forest ecosystem are
- Chlorophyll containing trees and plants
 - Herbivores
 - Carnivores
 - Bacteria and other microorganisms
33. Abiotic component includes
- Soil
 - Temperature
 - Water
 - All of the above
34. Which of the following statement is true
- Green plants are self nourishing
 - Producers depends on consumers
 - Biotic components includes all non-living components
 - Herbivores depend on carnivores
35. The motive forces responsible for the circulation of water in hydrological cycle are _____
- Thermal energy
 - Earths gravitation
 - Both a and b
 - Neither a nor b
