EDUCATION

- Amrita Vishwa Vidyapeetham, Chennai

Computer Science and Engineering - Cybersecurity

2020 - 2024

CGPA: 6.53
- Narayana Junior College

TSBIE- Telangana State Board Of Intermediate Education

2018 - 2020

Percentage: 87

SKILLS

CyberSecurity : Endpoint Security, Threat Detection, NMAP, Burp Suite, OWASP,Kali Linux, Metasploit, WireShark, Security Operations, Virtualization, Kernel Programming, Operating Systems, Networking, Ransomware, SNORT, Splunk, Malware Analysis

Languages : Python, C, HTML, CSS, JavaScript

Frameworks : Django, KMDF

Soft Skills : Continuous learning , Resilience

EXPERIENCE

- Project Intern

Society for Electronic Transactions and Security [SETS]

January 2024 - June 2024

–Developed and optimized tools for Endpoint Detection and Response (EDR), ransomware detection, and Intrusion Detection Systems (IDS) using Python, C.

–Created kernel drivers and utilized Windows APIs and PowerShell scripting for monitoring system calls, file operations, network packets, and analyzing event logs.

–Conducted behavioral and anomaly analysis for threat detection, focusing on ransomware and persistence mechanisms, and implemented automated response actions to mitigate threats.

–Collected, parsed, and analyzed event logs from various sources, and developed real-time monitoring dashboards and alerting systems for prompt detection and response to security incidents.

PROJECTS

- Medical Application

Amrita Vishwa Vidyapeetham

January 2024 - March 2024

– Implemented AES encryption for secure storage of patient health records, prescription forms, and vitals.

– Used ECDSA for digital signatures to ensure data integrity and authenticity.

– Employed homomorphic encryption for privacy-preserving computations on health data.

– Enabled real-time monitoring of patient vitals and sent alerts via email for health issues.

– Maintained compliance with HIPAA and GDPR standards for patient data protection.
- Payment Gateway Attacks

Amrita Vishwa Vidyapeetham

February 2023 - April 2023

– Intercepted a payment gateway portal and performed various attacks such as DNS and ARP spoofing, cookie stealing, and brute force attack using Burp Suite.

– Created a detailed documentation of the ongoing project.
- PURE HARVEST - An Android App

Amrita Vishwa Vidyapeetham

September 2023 - November 2023

– Developed Pure Harvest Android app using Java and other languages within Android Studio.

– Facilitated a community-driven platform where individuals can share their homegrown organic produce.

– Connected home gardeners and farmers, enabling direct sharing of organic fruits, vegetables, and other yields.

– Fostered a sustainable marketplace, promoting locally sourced and fresh organic foods.

– Designed to enhance accessibility, allowing users to directly access and share their organic produce with the community.

– Aimed to create a seamless experience for users to engage in sustainable and healthy food sharing practices.
